## A Note From Us To You

The thing we're most proud of and of course, appreciative of every day is that regardless of the market, we still receive continuous support from our supporters and community members in general. The thing that helped us the most was receiving feedback and knowing that each user at the end of the day, felt comfortable with using our launchpad, while also feeling welcomed in our community, which is something we always envisioned.

Even though many people in this space only have malicious plans and care only about money, we really worked hard to prevent scams and activities that could cause harm for their investors. So far, we are really proud of how the progress has been going and we appreciate the trust and faith you've all put in us. 2023 will be the year of GemPad and we won't let you down.

## A Note From Us To You

The market conditions in the past few months have not been optimal by no means, but we took this as an additional chance to build an even stronger bond with the community as well as working on future developments of our launchpad, bringing you fresh and never seen before utilities that really stand out.

We want to take this time to thank you for sticking with us and helping us achieve the success we did in the past year. You have our promise that together, we will achieve even greater things in the upcoming year and we won't be stopping any time soon. We are in this together and we appreciate all of the connections we made, showing there really are a lot of people with the same goal, which is to make the space safer and greater again.

We want to put a huge emphasis on the fact how important our community is to us and that we want to keep you away from any potential scams as well as encouraging projects with our mentoring and advising to really help them reach their potential.

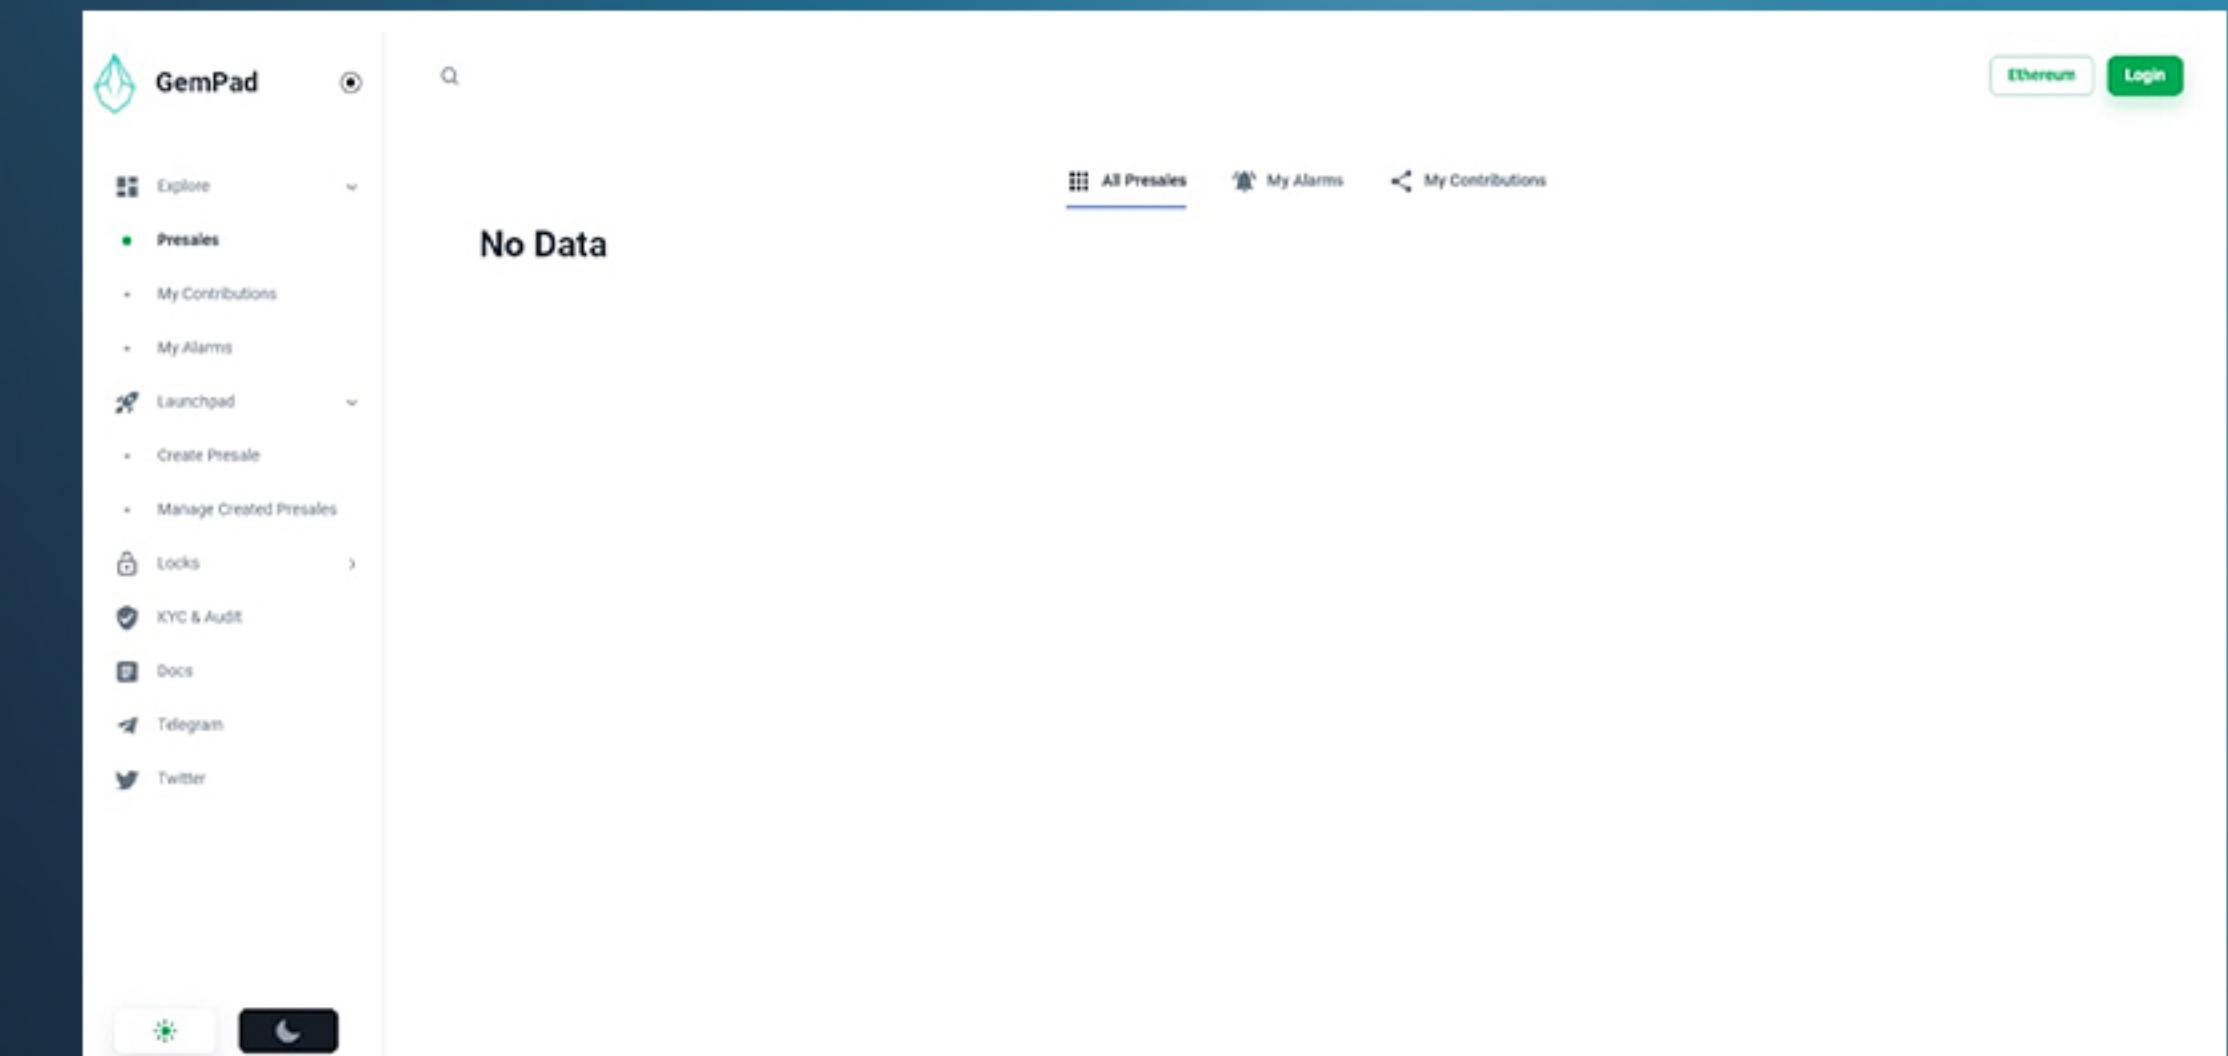

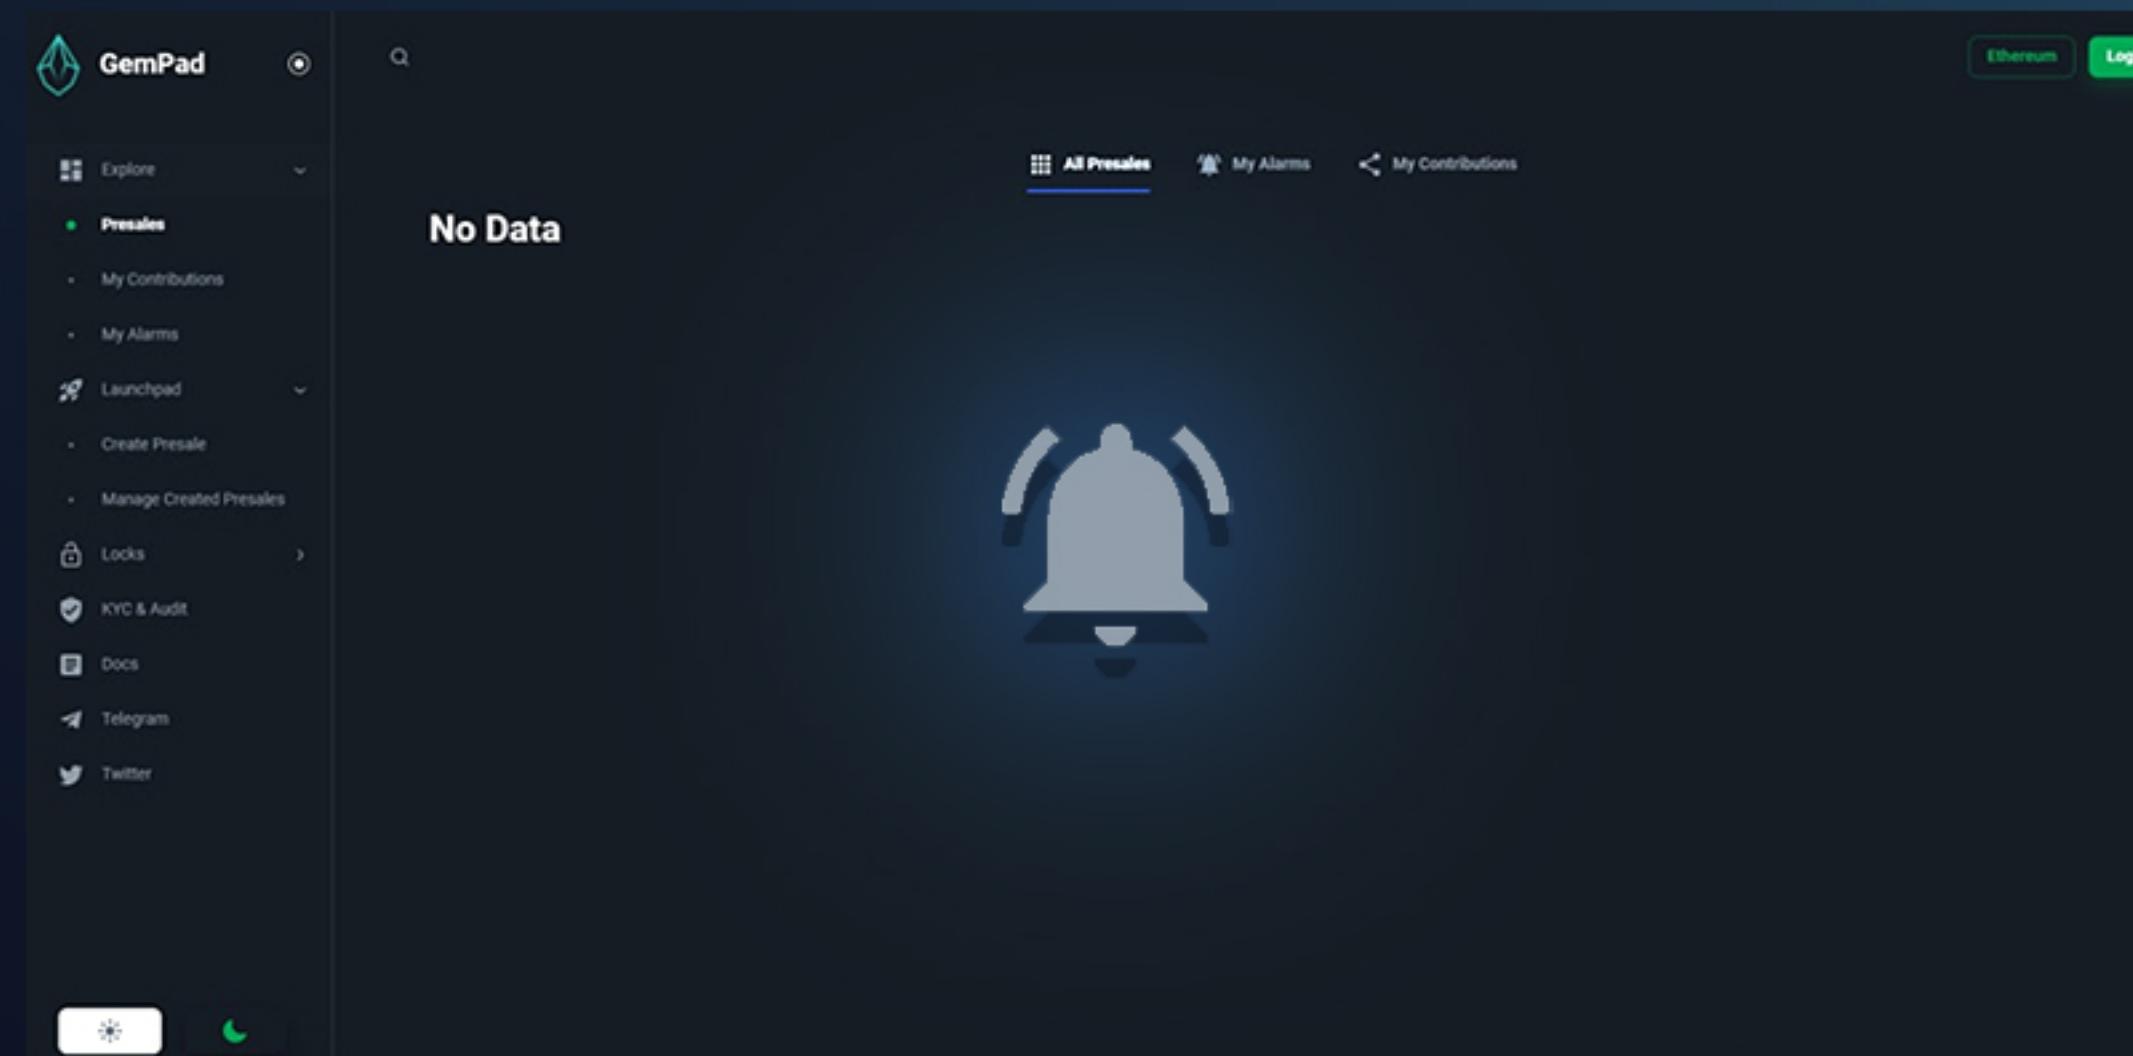

We cannot wait to show you all of the things we have been working on in the upcoming months. We appreciate the support, we could not get here without you, our community. It gives us motivation to want to improve even more.

Thank you once again for everything you did for us and we want to assure you that we have your back, just like you have ours.

# Highlights of the Year 2022

## January

On January 6th, 2022, the first sneak peek of the website was revealed, this was the very first step towards creating a better, safer, and more innovative launchpad. The GemPad launchpad concept was already established at this point including the great value fees (1 BNB + 2% of the total raise in BNB) and the different tiers (Common, Gold, Platinum, & Diamond).

By January 20, 2022, the launchpad was ready to cater to any BSC and ETH projects. It already included many new features at this stage never seen before in any other launchpad such as "My Alarms" a feature that notifies you before a sale goes live so you never forget a sale.

# Highlights of the Year 2022

February

On **February 11, 2022**, **GemPad** had its first ever presale.

This major milestone was achieved meaning a new beginning, a new opportunity for developers and investors to finally have a safe and transparent place for their projects. Projects will always experience having a challenging time raising a presale or private sale on their own. The process of creating a special contract for a presale made for their website is both time consuming and expensive compared to doing it with a launchpad such as GemPad.

# Highlights of the Year 2022

## March

On March 3, 2022, GemPad released a couple of updates that have helped project owners in their quest to launch their project. These updates included Special Sales, Token Vesting and Whitelist Timer Settings.

March was a very busy month; more projects began to understand the potential GemPad had and still has and with the level of support that is available to projects from the GemPad team, the news spread quickly.

Special Sales

# Highlights of the Year 2022

## April

On April 19, 2022, GemPad's native token **\$GEMS** had its very own presale on GemPad with a 400 BNB Hard Cap. **\$GEMS** comes with the great utility of **allowing holders to be whitelisted on the Tiers they are holding**. GemPad's investors seemed to be as excited for **\$GEMS** as the team was, filling the presale in just 30 seconds.

**\$GEMS** launched on April 26, 2022, where the Staking feature was also introduced allowing presale contributors to stake their token early and reap more rewards as the time goes on.

More and more contributors and project owners discovered GemPad in the month of April, the news was spreading through word of mouth and other avenues about the **exponential quality of service the team was offering to every project** that launched on GemPad.

# Highlights of the Year 2022

## May

Starting May 1, 2022 to May 8, 2022, GemPad experienced the biggest HTTPS DDoS attacks in history. It caught the attention of many media outlets and we still hold a record.

Wired: <https://www.wired.com/story/ddos-attack-botnet-crypto-platform/>

Tech Radar: <https://www.techradar.com/news/cloudflare-has-blocked-one-of-the-largest-ddos-attacks-of-all-time>

One thing to make note of is that thanks to the efforts of our development team, **contributors were still able to participate in the presale during this massive attack**. The bad actors who organized these attacks must be disappointed that GemPad made a clear statement that nothing will stop us from serving and providing our community with the best investment opportunities.

On May 16, 2022, GemPad was able to help a project fill a **2,500 BNB Hard Cap in a matter of a few minutes**. This is the biggest raise made with GemPad as of now.

# Highlights of the Year 2022

## June

On June 6, 2022, more features were added, namely Tiered Whitelist, Stealth Launches, the Favorite Button, BUSD pairing, Safu Badge, and improvements on the UI.

On June 7, 2022, the GemPad Buy Bot went live, which is completely free to use and which sends buys for the presale into the projects' Telegram group

June was also the month when the \$GEMS Certik audit was awarded, as the team understood that having one of the best auditors to check and certify the smart contract helped determine the credibility of the project.

# Highlights of the Year 2022

July

On July 6, 2022, GemPad announced another innovative feature, the [Token Creation Portal](#), that gives project owners the ability to [mint tokens directly on our website](#) for a reasonable price.

On July 12, 2022, the Alpha Club was introduced, giving the GemPad community more perks and control with the DAO voting system. [Only the members of the Alpha Club have the ability to buy Alpha Tiered projects.](#)

# Highlights of the Year 2022

August

On August 13, 2022, was the release of the [GemPad 1.4 Update](#), which included more UI upgrades, the Alpha Tier, GemPad Spotlight, Quick View powered by LaunchWall, Presale Calculator, and more.

On August 16, 2022, the [anti bot/sniper feature went live](#). GemPad becomes the [first and only](#) launchpad with the option that stops [all snipers and bots](#).

On August 26, 2022, GemPad improved the Token Creation service by [adding a Free Audit with the contract](#) and allowed the creation of tokens on the DogeChain network.

# Highlights of the Year 2022

## September

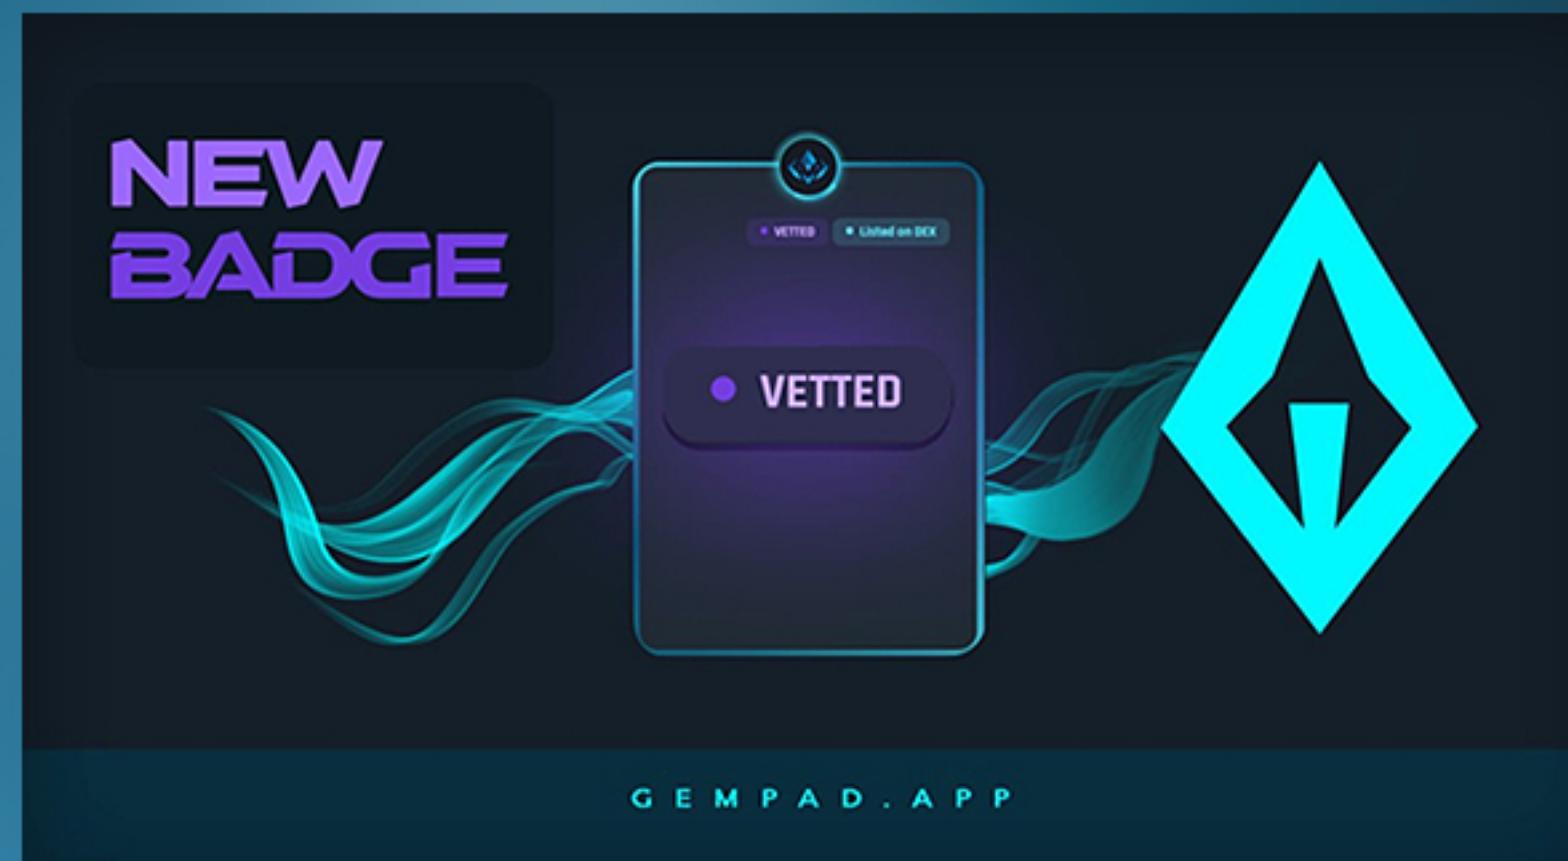

On September 1, 2022, the [Presale Alert bot](#) went live. This bot is powered by [LaunchWall](#). It sends alerts for every sale created on GemPad. [t.me/GemPadPresaleAlerts](https://t.me/GemPadPresaleAlerts)

We also focused on [growing](#) our team with new members joining our [partnerships](#), marketing and sales teams.

On September 8-9, 2022, GemPad was invited to the Organic Growth Expo. Organic Expo is an online EXPO. We attended this to raise awareness about our project and connect with our community.

On September 11, 2022, we also [removed](#) our own created 'SAFU badge' due to another launchpad using it for unintended purposes causing confusion amongst our community. We then replaced it with a [Vetted Badge](#) that is awarded to projects which pass the strict vetting process of our selected partners.

On September 25, 2022, GemPad website's [crosschain function](#) was updated to allow all sales to be displayed, no matter the network on the main page. This is a great help to project owners and investors alike.

# Highlights of the Year 2022

October

Multiple **Alpha Tier** projects successfully launched with GemPad, and our partnerships and the amount of project listings continued to **grow**. Alpha Tier projects are the best of the best and **reserved** only for our Alpha Club members.

# Highlights of the Year 2022

## November

November 10, 2022, the GemPad and [Assure Defi partnership](#) was announced. Assure Defi is the exclusive provider of KYC verification services for GemPad's higher tiers. They were chosen due to their excellent standard of verification.

In November the [Sales Representative position](#) was [reopened](#), giving more opportunities to people to work for GemPad and make money. In order to become a sales agent, contact [@aussiepip](#) on Telegram.

# Highlights of the Year 2022

December

GEMPAD.APP

Different **giveaways** and **events** were held in December. It was time to give back. Thank you for always being here and supporting our cause. Becoming a **part of the change** is never easy and we **appreciate** everyone becoming a part of a **safer** crypto space.

**0% BUY TAX

# Highlights of the Year 2022

## Our STATS

## Create A Token

As a proof that this service is a necessity, a total of **234 tokens** were generated in the span of **4 months** in this bear market. GemPad knows this is a necessary service that should be accessible to everyone who wants to create their own project.

## Total Projects

In the span of **11 months** GemPad was able to cater a whopping **539 projects** which is around **12 projects a week on average**, proving once again, that a project doesn't need to pay exaggerated fees to get the exposure and hype needed to have a successful presale. During these presales we were able to raise a total of **\$9,600,000+** which was safely contributed by the investors then received by the project owners without any problems or delay.

# Highlights of the Year 2022

## Partnerships

GemPad couldn't do everything just by ourselves, it's impossible to succeed in the crypto space alone especially during the bear market, which is why we are extremely grateful to all our partners who have been with us through **thick and thin**. We've announced **65** partners.

**KYC** partners like Assure Defi; Certik, ContractWolf, SolidProof, CoinScope, Expelee, & more. Auditors like Coinbazooka, CNToken, Freshcoins, & more.

Voting websites like Travladd, Z Launch, Phoenix Holding, Cheesus Lounge, & more.

We have also partnered with several KOLs and Influencers.

The partnerships made this year are just **the beginning**. GemPad aims to work with passionate, dedicated, and open minded groups that are building and helping the **crypto space** become better.

# Welcoming the New Year

Overall the year 2022 brought many firsts to the crypto world, some good and some bad, but nonetheless, this industry is a relatively new one and developing at a fast pace. In the new year, we may see more integration and adoption, and understanding of where the crypto industry needs to be improved. But all in all, 2022 was a year to celebrate at GemPad. Welcoming the New Year with a **sustainable business development plan** and many more innovations to come in 2023, we are excited for what's to come and want to thank each and every one of you for being with us so far.

Many of our community members have stayed with us since **GemPad's beginning** in early 2022, many more will join us in the future. For the ones who are here now and for the ones to come, we make a promise to always **move with integrity and transparency and dedicate ourselves to bettering the crypto space for all**. We enter the new year stronger than ever, with a growing community by our side and focused on the vision we have had since our outset; we are looking forward to the successes that 2023 will bring. Moreover, global adoption of crypto is happening and we are here for the long-haul. We have confidence not only for GemPad but the crypto market in general. **Success for the crypto industry is inevitable** and GemPad plans to be not only a leading launchpad but a leader in the DEX space in general, while bettering the space and making it safer for all.

**Thank you** for being with us once again.
